

Presepe vivente, Christmas time

The representation, that ends with the visit to the Sacra Famiglia (Holy Family), is along the slope that leads to the Caverna di Frasassi and to the entrance of the same cave. You can see more than two hundreds characters doing ancient activities; the characters are in a very scenographic natural environment.

Vetrina dell'artigianato, summer

Inside the ancient rooms of the castle of Genga every year takes place a show in which the protagonists are the artisans and the food producers of the territory, together with artists who organize exhibitions.
